Name: Zudzin Huang
Student Number: 1011087556

Question 1

(1) How many entity classes are there in the schema (`org.example.schema.CMS.*`)?

There are 5 entity classes in the schema: `Course`, `Professor`, `Student`, `Teaches`, and `Transcript`.

(2) What purpose does the `cms-ddl.sql` file serve? Where is it used?

The `cms-ddl.sql` file is the database schema that sets up the entire database, initializing all the tables in the system. It is used in `CMS.dbconfig` through the `dbDdl` setting and used during compile time and also in runtime to create tables.

(3) What are the foreign keys of the `transcript` table?

The foreign keys of the `transcript` table are `studentId` and `courseId`.

(4) How many parameters does the `FindStudent` query have?

The `FindStudent` query has one parameter, `studentId`.

(5) What format is the database stored in?

The database is stored in memory as a DuckDB database.
